PROFESSIONAL SUMMARY

A recent Bachelor of Science in Information Technology graduate with a strong foundation in web development, frontend technologies, and UI/UX design. Proficient in HTML, CSS, JavaScript, Python, Java, and C++, with hands-on experience building responsive, user-friendly web applications through academic and personal projects. Knowledgeable in modern web design principles, wireframing, prototyping, and creating intuitive user interfaces using industry-standard design tools. Skilled in translating design concepts into functional, responsive websites while maintaining usability and accessibility. A detail-oriented, adaptable, and fast-learning professional with strong problem-solving abilities, eager to contribute to innovative development teams and continuously enhance technical and design expertise.

SUMMARY OF QUALIFICATION

- Bachelor of Science in Information Technology graduate with a strong academic foundation in software development, web technologies, and information systems.
- Effective communicator with excellent interpersonal and presentation skills, developed through academic projects, team collaborations, and technical presentations.
- Strong organizational and time management skills, with the ability to prioritize tasks and consistently meet deadlines.
- Analytical problem-solver with critical thinking abilities gained through software development, system analysis, and research-based projects.
- Quick learner who adapts easily to new technologies, tools, and development frameworks.
- Proficient in HTML, CSS, JavaScript, Python, Java, C++, Microsoft Office Suite, database management, and web development tools.
- Familiar with UI/UX design principles, responsive web design, wireframing, prototyping, and creating user-centered interfaces.
- Collaborative and dependable team player with a strong work ethic, attention to detail, and commitment to delivering high-quality results while continuously improving technical and professional skills.

PROFESSIONAL SKILLS

- Technology Proficiency: Skilled in using development tools, productivity software, and digital technologies to complete tasks efficiently.
- Teamwork & Collaboration: Works effectively with others, contributes ideas, and supports shared goals in team environments.
- Critical Thinking: Analyzes problems logically and develops practical, well-informed solutions.
- Communication: Communicates ideas clearly through written documentation, presentations, and discussions.
- Leadership: Takes initiative, organizes tasks, and helps guide teams toward achieving project objectives.
- Adaptability: Learns new technologies quickly and adjusts effectively to changing requirements and challenges.
- Programming & Web Development: Proficient in HTML, CSS, JavaScript, Java, Python, and C++, with experience developing responsive web applications.
- UI/UX Design: Applies user-centered design principles to create intuitive, responsive, and visually appealing digital interfaces.
